

# App Overview

FineDrop is an interactive mobile application designed to gamify and simplify user engagement with airdrop campaigns. The app provides users with multiple ways to earn rewards through various activities, including task completion, tapping-based earning, and strategic card-based upgrades.

## Key Features

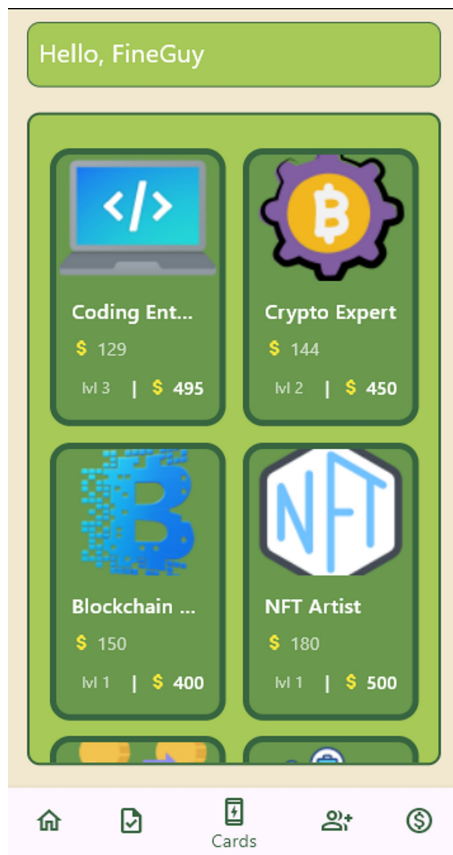

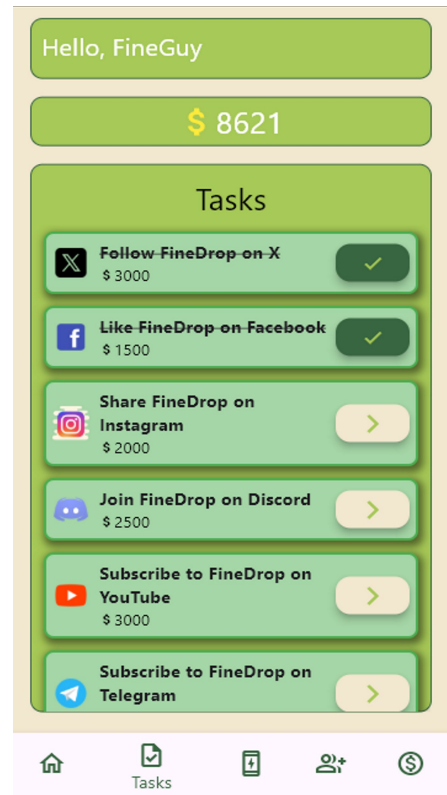

### 1. Tap-to-Earn Mechanism

- Users can earn points by tapping, which contributes to their overall balance.
- Progression system with milestones and upgrades.
- Boost feature to enhance earning potential.

## 2. Task-Based Rewards

- Users complete social media and community engagement tasks to earn in-app currency.
- Tasks include following on X (Twitter), joining Telegram groups, subscribing to YouTube channels, and more.
- Rewards vary based on task complexity.

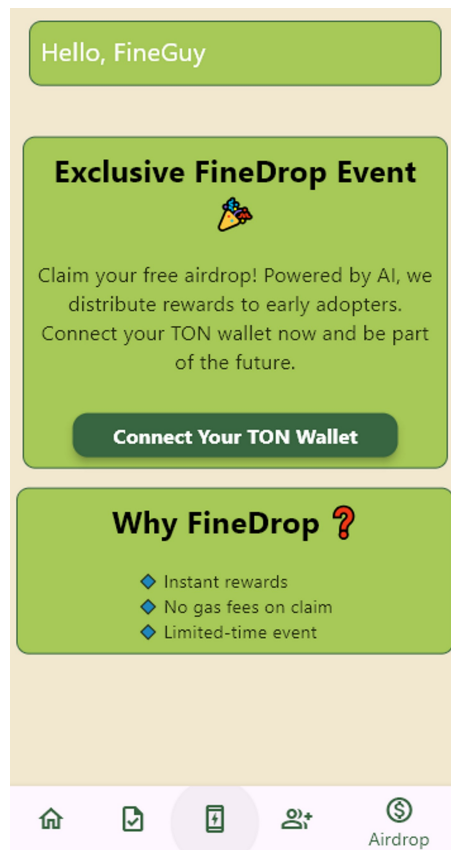

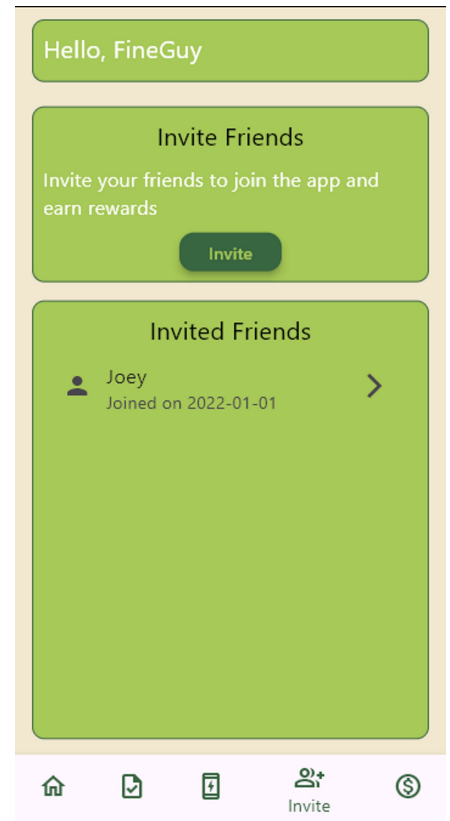

## 3. NFT-Inspired Card System

- Users can acquire and upgrade cards representing different skills or professions (e.g., Coding Expert, Crypto Expert, NFT Artist).
- Cards provide passive income over time, boosting the user's earning potential.

## 4. Referral System

- Users can invite friends and earn rewards for each successful referral.
- Additional bonuses for referrals who actively participate in tasks and activities.
- Unique referral codes for easy tracking and incentives.

## 5. Gamified User Experience

- Interactive UI with a progression system to keep users engaged.
- Smooth and visually appealing interface with easy navigation.
- Personalized user dashboard displaying earnings, tasks, and progress.

# How It Works

FineDrop provides multiple ways for users to earn points, which can later be converted into real rewards. The key earning mechanisms include **tapping, completing tasks, investing in cards, and referrals.**

## **1 Tap-to-Earn (Points per Tap & Boosts)**

- Users earn points with every tap.
- The “Boost” feature increases the points earned per tap, accelerating progress.
- The more taps, the faster users reach the next level and unlock new features.

## **2 Task-Based Rewards**

- Users complete simple tasks like following social media pages, subscribing to channels, or joining groups.
- Once a task is completed, users instantly receive points as a reward.
- Higher-value tasks give more points, allowing users to progress faster.

## **3 Card Investments & Passive Income (Profit per Hour)**

- Users can invest their earned points in special **cards** representing different skills or professions.
- Buying cards reduces available points but **increases "Profit per Hour"**, generating passive income over time.
- This allows users to **earn points automatically** without constantly tapping.

## **4 Referral System**

- Users earn additional points by inviting friends to join FineDrop.
- The more active referrals a user has, the more bonus points they receive.

## **Earning More = More Rewards**

As users accumulate points through tapping, tasks, card investments, and referrals, they increase their earning potential. Over time, these points can be converted into real rewards, making FineDrop a fun and profitable experience!
